SUMMER 2002

Studies have shown that radio listeners will resist or turn off a) unfamiliar music, b) bad music, c) bad music which is unfamiliar, and d) all sound not covered in a, b, or c, based solely on mood, whimsy, and chance astrological positioning. Applying these results, MEDITATION ON A MUSICAL THEME will make a vain attempt at conformity in Summer2k2. Thus, we choose to dispense with diversity and fall back solely on geeky robot music. (which, yes, contradicts the above) In observance of Loop Year, 2002, (not to be observed again until 2112) join DJ POSEUR for classic electronica every Friday from 10pm until bedtime on 91.5FM, WOBC.
